Nebraska Department of Labor, Labor Market Information

Information, The Cutting Edge In Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a survey of Nebraska Manufacturing Industries and Hospitals. Nebraska is participating in a nation-wide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on present and future employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information appears in the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides somes firms with indicators of potential types of jobs available in their industries and area labor market.

The Occupational Employment Survey is done only once every three years for an industry. This year (1986) the manufacturing industries and hospitals will be surveyed. Next year (1987) the nonmanufacturing industries will be surveyed. The third year (1988) will cover the balance of nonmanufacturing industries.

Due to the size of the industry, manufacturing industries and hospitals survey participants were selected on a random sample basis.

ATTENTION!! You may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

Information, The Cutting Edge In Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a survey of Nebraska Manufacturing Industries and Hospitals. Nebraska is participating in a nation-wide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on present and future employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information appears in the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides somes firms with indicators of potential types of jobs available in their industries and area labor market.

The Occupational Employment Survey is done only once every three years for an industry. This year (1986) the manufacturing industries and hospitals will be surveyed. Next year (1987) the nonmanufacturing industries will be surveyed. The third year (1988) will cover the balance of nonmanufacturing industries.

Due to the size of the industry, manufacturing industries and hospitals survey participants were selected on a random sample basis.

ATTENTION!! You may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

Nebraska Department of Labor, Labor Market Information

Information, The Cutting Edge In Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a survey of Nebraska Manufacturing Industries and Hospitals. Nebraska is participating in a nation-wide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on present and future employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information appears in the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides somes firms with indicators of potential types of jobs available in their industries and area labor market.

The Occupational Employment Survey is done only once every three years for an industry. This year (1986) the manufacturing industries and hospitals will be surveyed. Next year (1987) the nonmanufacturing industries will be surveyed. The third year (1988) will cover the balance of nonmanufacturing industries.

Due to the size of the industry, manufacturing industries and hospitals survey participants were selected on a random sample basis.

ATTENTION!! You may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

1/ Source of Data: ESARS (Employment Security Automated Reporting System). Includes those applicants registered for work in Nebraska Job Service Offices, and whose applications remained active as of June 30, 1986. These totals do not include all persons in Nebraska seeking jobs as of June 30, 1986. Also, one-digit occupational group totals include applicants assigned an entry code (lacking experience and/or training needed for a complete occupational classification). In the case of occupational group totals for clerical and sales, service, and miscellaneous, the entry codes are included in the total but cannot be assigned to the selected two-digit occupational subgroups shown, and consequently those subgroup totals will not add to the occupational group total.

2/ Total includes those not assigned an occupational code.

3/ Includes Black (not Hispanic), Hispanic, and other races. "Other races", include American Indian or Alaskan Native, Asian or Pacific Islander, and others.

4/ Includes mining, logging, utilities, miscellaneous amusement and recreation, graphic art work.
